

“CIRCULAR ECONOMY ROADMAP FOR CHILE”

PROJECT SUMMARY:

Build a Circular Economy Roadmap that sets the path towards a new form of sustainable development and a Circular Chile of the future, with a view to 2040 through the development of a participatory process and co-construction of the different components of the strategy, involving actors from the public, private, academic and civil society sectors.

OBJETIVES:

Build a circular economy roadmap for Chile, which is part of the strategy to adopt a model of sustainable development in the country.

1. Identify and characterize gaps and opportunities to adopt CE
2. Build a Shared Vision of the Strategy
3. Co-design a Roadmap to achieve the shared vision
4. Develop an Action Plan for the implementation of the Roadmap
5. Develop a Monitoring Plan for the implementation of the Roadmap

MAIN MILESTONES OF THE PROJECT:

1. Conducting interviews with key actors in circular economy
2. Development of citizen participation processes
3. Definition of a shared vision among all the actors
4. Elaboration of a roadmap with a friendly design
5. Definition of concrete initiatives for its implementation in the short, medium and long term
6. Dissemination of the roadmap

STRATEGIC PARTNERS:

National consultants: D&W Solutions - application of the methodology for the development of roadmaps to create a CE roadmap and Héctor Vega - workshop facilitator
International consultant: Ladeja Godina - project advisor, experienced in the creation of Circular Economy roadmaps.
